

## Fruit Salad

Are tomatoes fruit?

I don't like the ones from texas. They are duplicitous. In from one mouth, and out the other. The leaves dead.

Does celery belong in the bowl? Insipid; grown in curry spiced soil. Now it likes to be in snow capped sheets.

The other fruits are bland. Harvested FILLER!

Why eat a fruit salad? Leave it to those who lack taste.

What joy it is to eat your vegetables. Sustenance.
